Gopi Mahamkali

Software Engineer | Hyderabad, India | Portfolio

+91 83093 83698 | gopimahamkali3101@gmail.com | linkedin.com/in/gopi | github.com/Itz-gopi204

Education

Rajiv Gandhi University of Knowledge Technologies, AP — Nuzvid, India
Bachelor of Technology in Computer Science | GPA: 8.99/10 — *Sep 2023 – May 2027*

Experience

Software Developer Intern — June 2026 – Present
Qualizeal

- Built an **intake chatbot** with **FastAPI** that reads uploaded project documents, such as PDF and Word files, and fills in the project details automatically by using **Agentic RAG Architechture** .
- Implemented **multitenant login** with **Keycloak** so each customer has its own users, a limit on how many people can sign in, and separate admin and user roles.
- Designed **10+ RESTful APIs** in **Node.js** and **Fast-API** to generate a project's **risk list** from its details, then generate and manage the **metrics** used to check those risks.

Software Developer Intern — Oct 2025 – March 2026
4SightAI

- Engineered **RESTful APIs** using **Fast-API** and optimizing end-to-end processing latency from **600ms to 400ms** via an asynchronous architecture.and improving system scalability to support **1,000+ daily active users**.
- Collaborated within a distributed **Agile team of 8 engineers** to deliver modular features, ensuring high code quality through rigorous **Git** version control and code reviews, which reduced post-deployment bugs by **25%**.
- Engineered robust signature and stamp detection modules using a custom-trained **YOLO-based computer vision model** to ensure high data integrity across diverse formats.

Projects

SignalForge | Fast-API | PostgreSQL | Prisma | OpenAI | WebRTC — GitHub

- Architected a **multi-tenant AI interviewing platform** supporting **3 user roles** with secure **RBAC** and automated workflows, reducing manual recruiter scheduling overhead by **40%**.
- Integrated **OpenAI Realtime API**, **Deepgram**, and **WebRTC** to engineer low-latency (<**500ms**) voice conversations featuring bidirectional audio processing and **95%+** transcription accuracy.
- Designed a normalized **PostgreSQL** schema via **Prisma ORM** and implemented **RESTful APIs** to efficiently orchestrate concurrent interview sessions, transcript storage, and AI evaluations.

Voice-Based Email System | Flask | Whisper | Gmail API — GitHub

- Built a hands-free, **AI-powered email platform** supporting **25+ concurrent voice commands** for composing, searching, and managing emails, significantly streamlining inbox navigation.
- Integrated **Whisper Speech-to-Text**, **gTTS**, and the **Gmail API** via a **Flask** backend, achieving **98% transcription accuracy** to deliver seamless end-to-end voice interaction.

Technical Skills

Languages: C++, Python, Java, SQL
Core CS: Data Structures & Algorithms, System Design, OOP, DBMS, Operating Systems, Computer Networks
Backend: Node.js, Flask, FastAPI, RESTful API Design
Databases : PostgreSQL, MySQL
Developer Tools: Git, Docker, Postman
ML/AI: PyTorch, Machine Learning, Deep Learning, Computer Vision, LLM's, Generative Ai

Achievements

- **AIR 3863:** Secured **All India Rank 3863** in GATE Data Science & AI (2026) assessing DBMS,Python fundamentals and ML theory.
- **Competitive Programming:** Solved 400+ Data Structure & Algorithms problems on LeetCode & TakeUForward.
- **AI4Andhra Police (Winner):** Engineered a scalable, production-ready software solution for text extraction under strict hackathon time constraints, winning 1st place among national-level competitors.
- **HackRX 6.0 (Top 50):** Designed and delivered an innovative, functional Gen Ai based prototype within a rigorous **36–40 hour** timeframe competing with 1000+ teams.
